- Scales easily to the highest volume banks while simultaneously supporting low volume firms with full automation
- Provides a single, consistent point of integration and state-of-the-art security
- Offers real-time trade status and give-up information
- Provides on-demand and notification status updates
- Enables daily review and status information reports

Best in Post-Trade Services...

Traiana was voted "Best Vendor for Post-Trade Services" in the annual FX Week survey

Harmony Message Center gives prime brokers, executing brokers and their clients a global messaging hub to manage all prime trading. Harmony Message Center replaces multiple manual processes and point-to-point integrations between banks, prime brokers and funds with a real-time, low latency solution that tracks the flow through the lifecycle of the give-up – from notice of execution to step-in, with a full audit trail.

Whether a firm faces the challenges of providing a straight-through-processing (STP) solution to a large and diverse client base, needs to manage the inherent risk of high volume algorithmic trading, or is looking to improve operational efficiencies, Harmony Message Center increases operational efficiency and reduces risk. Harmony Message Center requires minimal IT or systems investment – it adapts to industry standards and has a vast library of pre-built connectors to speed adoption.

Harmony Message Center, an industry standard for STP for prime brokers that gives access to all counterparties through a single connection

Reduces operational risk

The manual reporting and keying of trades increases the likelihood of miss-keyed trades – which can result in real economic loss. Harmony Message Center creates true system-to-system STP, electronically connecting executing brokers directly to prime brokers. Trades are tracked to ensure economic terms have reconciled and the prime broker has agreed to become counterparty to the trade.

Improves operational efficiencies; reduces cost and time

Using Harmony Message Center, a single connection delivers the entire universe of executing brokers, prime brokers and ECN. Executing brokers can rapidly onboard new prime broker relationships, and prime brokers can allow clients to trade anywhere, knowing that STP is already enabled through existing Harmony connections.

Lowers the cost of ownership

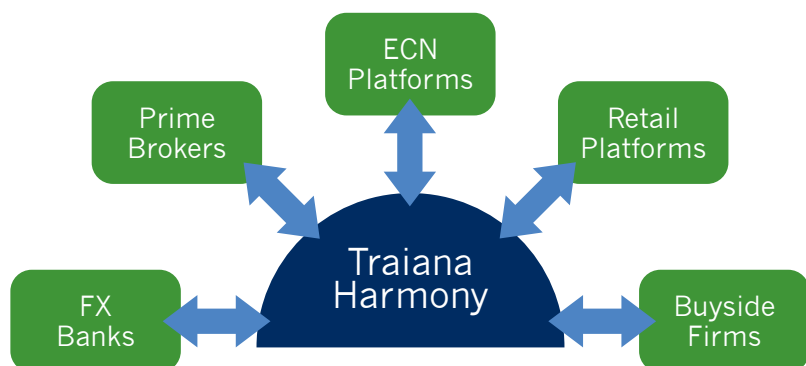

Delivering the power of the Harmony network has never been easier - there is no software or IT requirement for connecting to Harmony. Instead, Traiana has a proven methodology and vast library of integrations used to connect your system to the network quickly with no IT footprint required.

Traiana Harmony: Comprehensive end-to-end post-trade processing across market participants

Traiana Harmony connects over 500 firms including major FX banks, prime brokers, ECN's, and buy-side firms. With complete end-to-end automation of the post-trade pre-booking processes, clients receive responsive service, while reducing operational risks and costs. Client interaction happens seamlessly, without the need to commit resources to customized STP connections and workflows.

Traiana Harmony offers a comprehensive post-trade solution, providing direct systems integration and flexible workflow solutions that are focused on clients' specific behaviors and needs, significantly reducing post-trade costs.

Joining the Harmony community has never been easier – you don't have to worry about message formats or naming conventions; and we connect you without an IT footprint. Once connected, you're always connected to every Harmony member no matter what services may be required.

Connected to over
500 firms

Marketing standard
for post-trade FX

Scale your FX business profitably and reliably

No matter what your role in the FX market, Traiana Harmony allows your business to scale. The Harmony network removes the frictional costs associated with maintaining numerous connections and formats. Relieved of these costs, firms can focus on the business at hand: growth and profitability.

The Power of the Community

The power of the Harmony community is unrivaled within the FX marketplace. By joining the Harmony network, you gain the collective knowledge and experience of the entire community. And, it's easy to join – Traiana Harmony takes care of all translation and mapping requirements, integrating your systems, using your standards. Through this single connection, you have immediate access to Traiana Harmony's network and comprehensive suite of post-trade workflow solutions.

Solutions for FX Sales, Operations and Client Service

Harmony offers more than STP and messaging: it's a network-based platform for solutions which comprehensively address the FX sales and operational needs of prime brokers, broker dealers, introducing brokers, retail brokerage firms, retail platforms, custodian banks, and buy-side firms, including asset managers, commodity trading advisors, hedge funds and algo trading firms. Today, members are using Traiana Harmony to manage end to end post-trade including confirmations, allocations, credit, retail aggregation, client servicing and middle-office processing across disparate silos and systems.

About Us

Founded in 2000, Traiana operates the industry- standard platform for electronically processing over-the-counter foreign exchange trades. The firm's flagship offering, Traiana Harmony, is the leading platform for connecting all FX market participants to automate post trade processes, reducing the risk and cost of trade processing. The network includes over 500 major prime brokers, executing banks, retail platforms, buy-side firms and execution venues. Traiana has offices in New York, Chicago, London and Tel Aviv. Traiana is owned by ICAP plc., the world's largest interdealer broker.
