

CCP Connect

Central clearing through one connection.

CCP Connect consolidates clearing connectivity to CCPs, SEFs and MTFs for over 500 global counterparties by automating the complex workflows required by regulators and CCPs. Eliminating the operational challenges and reducing the costs that stem from the move to central clearing for FX, equities, equity derivatives and exchange derivatives.

CCP Connect – Supported Clearing Models

Key Benefits

SEF Submission

CCP Connect enables venues to submit trades directly to CCPs for clearing, leveraging Traiana's established connectivity and cross-market presence.

FCM – CCP Connectivity

CCP Connect connects FCMS directly with CCPs – a low-latency and standardized messaging and routing service.

Allocation

CCP Connect supports, facilitates and streamlines the allocation process.

CCP Connect is the comprehensive trade registration solution that adds central clearing and regulatory compliant services to Traiana's market standard post-trade network for FX, fixed income, cash equities, swaps and NDFs.

Designed for swift and simple implementation, software and IT requirements are minimal. Through one connection, the solution links Prime brokers, Executing brokers, CCPs and Venues, so that firms can be ready with a central clearing solution as soon as regulations are announced.

Developed specifically to meet the demands of the current regulatory environment, the solution manages trade registration by providing a flexible and configurable transformation, routing and matching service. Furthermore, CCP Connect dramatically reduces costs for Executing Brokers clearing cash equities.

CCP Connect is adaptable and can scale to meet challenges as yet beyond the horizon, ensuring compliance with today's regulatory landscape and future-proofed for tomorrow.

Key: In Production In Analysis

One Connection

Spares firms and institutions the headache of maintaining multiple connections to multiple clearing venues by consolidating clearing workflows.

Future-proofed

Provides on-going comprehensive controls and a full audit trail, preparing not only for today’s regulatory obligations but also those which lie beyond the horizon, without the need for multiple deployments.

Simplify

Manages the complex trade relationships impacted by new legislative changes, providing a flexible and configurable transformation, routing and matching service.

Reporting

Make the trades that you want, when you want to, and be secure in the knowledge that all central clearing obligations, across asset classes, are being met by one comprehensive package.

Implement

The solution is easily deployed with minimal IT footprint, and leverages the existing comprehensive connectivity of Traiana’s industry-leading network processing FX, exchange traded derivatives, cash equities and equity derivatives.
