

Traiana™

In the middle of the markets, at the heart of innovation.

ClientLink

The universal gateway to the markets. Fast, connected and secure.

ClientLink is a complete, robust and proven client servicing solution delivering automation across the trade lifecycle for FX, fixed income, repos, cash equities, equity swaps, contracts for difference (CFD), exchange traded derivatives (ETD), non-deliverable forwards (NDF) and swaps. Connecting every Traiana member across all services, through one connection.

ClientLink offers an integrated FIX and SWIFT gateway for cash equities and fixed income trading, intra-day CFD confirmations and allocation/confirmation automation for equity swaps. The solution allows seamless integration while dramatically increasing STP rates.

Designed to support the changing demands of participants on both sides of the markets, with low investment roll-out and deployment models designed to protect the client relationship.

ClientLink operates an unrivalled network of participants trading ETD, as well as the industry's broadest community for FX, equities, fixed income, and CFD/equity swaps. Simplifying multi-brokerage, while delivering real-time, low latency trade notifications and matching.

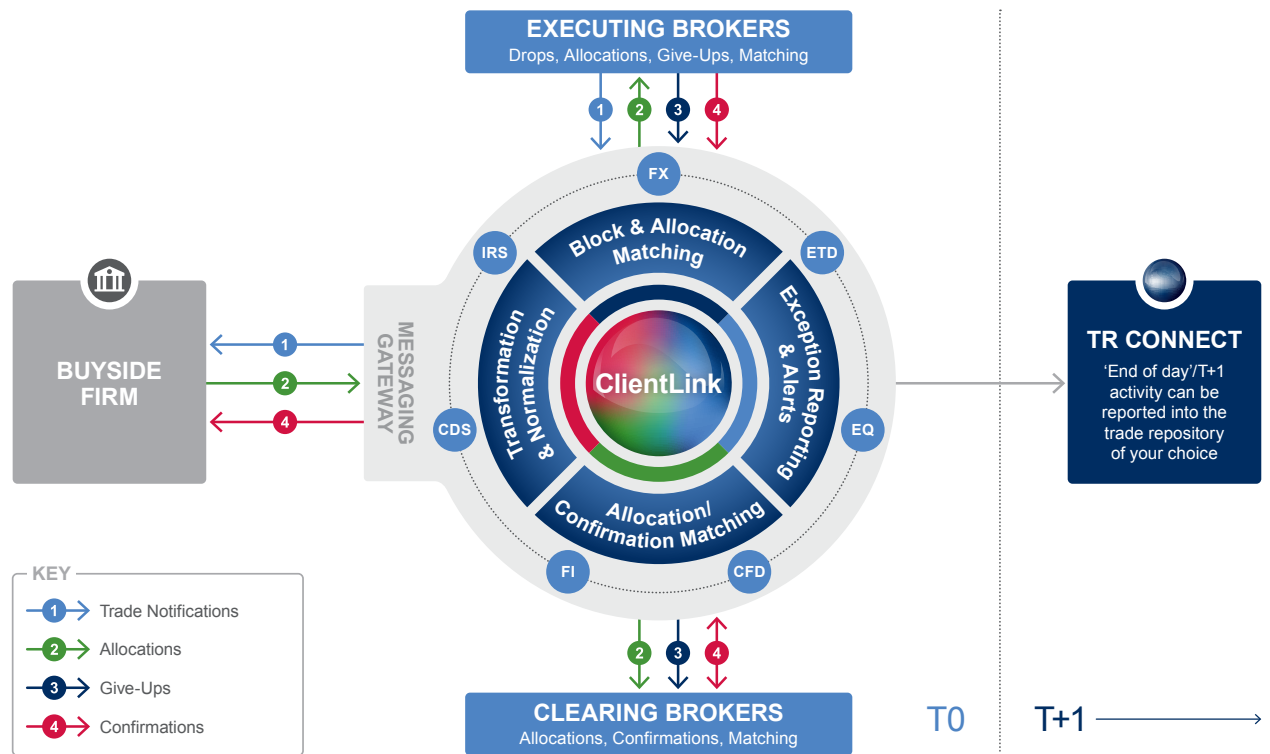

ClientLink features a revolutionary message transformation infrastructure which is fast and simple to implement. New clients can be set up in minutes to send and receive trade information in their own format and language, including any structured or unstructured message type.

An open, scalable bank-grade solution designed to meet the needs of Buy- and Sell-side firms alike, ClientLink allows counterparties to easily allocate and confirm trades within clients' chosen message protocol, resulting in improved client servicing. This single platform removes the cost burden of maintaining numerous connections and formats, allowing firms to focus on the business at hand: growth and pursuing opportunity.

ClientLink – Tri-Party Model

One Connection

Through one seamless connection, ClientLink replaces the need for customized STP connections and workflows. A single point of integration to over 1,000 market participants and trading venues.

Low Latency

ClientLink offers a best-in-class secure STP allocation and confirmation platform for Banks, Brokers and Buy-side firms, providing over 1,000 connections across asset classes with Prime, Executing and Clearing Brokers.

Reduced Cost

ClientLink lowers post-trade settlement cost through automation, reducing errors and providing real-time processing. It requires low investment roll-out and is fast and simple to implement.

Scalable & Robust

Future-proofed to support changing demands, the solution is open, scalable and designed to support Buy- and Sell-side firms alike. Enabling market participants to scale at will, allowing them to focus on growth and opportunity.

Post-trade Management

Complete end-to-end automation of post-trade processes delivers a real-time responsive service, reducing operational risks and costs. Streamlined and exception-based management of trading relationships across venues and brokers lowers workload.
