

**Traiana™**

In the middle of the markets, at the heart of innovation.

## Harmony

One connection to the global financial markets.

Traiana's Harmony network delivers global market connectivity, processing the trades generated by over 1,000 Buy- and Sell-side participants for FX, equities, equity derivatives and exchange traded derivatives.

Harmony's scalable and agile platform provides comprehensive visibility into activity across markets and within an enterprise, delivering optimized risk management, regulatory compliance and pre- and post-trade processes. This ensures visibility into complex workflows for firms and institutions on both sides of the markets, as well as in trading venues and platforms.

Automation of matching, confirmation and affirmation processes, as well as post-trade settlement and clearing, facilitates higher STP and greater risk-management by minimizing human input error, which can lead to settlement failure.

This robust, comprehensive connectivity solution links all market participants on Traiana's best-of-breed low latency network, Harmony. This results in high speed-to-market as well as real-time communication across the trade lifecycle.

Harmony is easy to implement: Traiana takes care of all translation and mapping requirements, integrating with client systems, using their standards. With one connection, gain immediate access to a comprehensive suite of solutions that streamline pre- and post-trade workflow, regulatory compliance and risk management.

Harmony – Global, Connected, Secure

### Operations

Harmony is designed to simplify and streamline processes across the trade lifecycle, driving STP from front-office execution to back-office settlement.

### Connectivity

Harmony connects more than 1,000 market participants who trade across asset classes; FX, exchange traded derivatives, fixed income, CDS, cash and synthetic equity transactions.

### Risk Management

The low latency solution delivers risk management across trading lifecycles- from the legal framework underpinning the margin or prime brokerage relationship, to direct active trade and position monitoring.

### Regulations

With legislations being introduced more quickly and with compressed deadlines, Harmony ensures processes are compliant with regulations today and future-proofed to meet the demands of tomorrow.

### Universal

Harmony works across the markets: Banks, Prime Brokers, Executing Brokers and Buy-side firms, as well as the many trading and clearing venues and platforms.
