

Traiana™

In the middle of the markets, at the heart of innovation.

Message Center

Centralized trade management through one connection.

Message Center enables both Buy- and Sell-side financial market participants to manage all global FX transactions and CFD/Equity Swap give-up activity through a central hub.

Message Center integrates with existing systems through both industry-standard and custom in-house protocols. The solution replaces manual processes and point-to-point connectivity with a secure, real-time and low-latency platform. State-of-the-art security facilitates compliance with ever-changing global regulations, data integrity, and clients' peace of mind.

Message Center provides a single, consistent point of view into STP workflows through an intuitive, rich and easy-to-use web-based user interface. Scaling easily to accommodate any volume, this ensures visibility and transparency into all steps of the trade booking process.

Key Benefits

One Connection

With a single integration to Message Center through Traiana's Harmony network, Buy-side firms can communicate with the entire Street in their native formats.

Efficient Processes

Trades are entered once and feed the whole post-trade lifecycle in real-time.

Reduced Operational Risk

Automated processes reduce keystroke and manual errors.

Enhanced Trade Visibility

Buy-side firms gain a single view of their trades, positions and credit utilizations across all executing brokers, electronic platforms and prime brokers.

Refined Position Management

Real-time tracking of realized and unrealized P&L, across or within accounts, trading relationships, strategies and traders – inclusive or exclusive of fees.

Strengthened Audit Trail

Records each instance of each lifecycle step of each trade.
